EVERLAST TRUCK BODIES™

The worldwide leader in lightweight composite work truck bodies.

HARD-CORE BODY FOR HEAVY-DUTY USE

RUGGED. DURABLE. STRONG. LIGHTWEIGHT.

BrandFX™ rugged EverLast™ line bodies offer a number of advantages when compared to conventional metal bodies – and fiberglass-based, composite construction is the difference maker. This unique construction results in line bodies that combine light weight, high strength, and durability to deliver substantially improved fuel efficiency and years of reliable service in even the harshest of work conditions. All of which earn BrandFX the distinction of being the Life Cycle Value Leader™ of the industry.

BRANDFX
EVERLAST TRUCK BODIES™

BrandFX – a trusted supplier for Aerial and Crane Applications.

- Compatible with all leading manufacturers of service cranes, aerial devices and digger derricks.
- Trusted by leading North American utility, telecom, and service companies.

AS TOUGH AS STEEL WITH EXTRA BENEFITS

BrandFX™ EverLast™ line bodies are designed and manufactured to handle the same loads as steel bodies. The high-strength construction of these bodies ensures that they can handle the toughest, most demanding jobs you can throw at them. And they can accommodate virtually any crane and aerial installation. Additionally, these bodies are easy to repair and will not rust – so the ability to maintain an attractive appearance long term is built-in. With all of these benefits, EverLast line bodies are unmatched by any conventional steel or aluminum design.

UP TO 60% LESS WEIGHT THAN CONVENTIONAL STEEL

The lighter weight of these bodies provides for significantly better fuel economy and reduces wear on tires, brakes, and suspension components. Using an EverLast line body instead of a conventional metal design will also add to the load capacity of a truck. In fact, in some cases the lighter weight of these bodies will actually allow an operator to downsize vehicles.

LONGER LIFE SMARTER PURCHASE

BrandFX EverLast line bodies have been proven to deliver more than 20 years of reliable service in the toughest conditions. They also maintain their quality finish and appearance, unlike conventional steel and aluminum which will dent and rust. That's why, for over 30 years, many companies, including 5 out of the top 6 U.S. service fleets, have counted on the toughness and durability of BrandFX EverLast Work Truck Bodies. These bodies do more than just save you money. They deliver real life cycle value.

MADE IN AMERICA. BUILT TO LAST.

Because BrandFX believes in American-made quality, all EverLast line bodies are manufactured in the U.S. Utilizing almost one million square feet of manufacturing space in facilities strategically located across the U.S., BrandFX is positioned to meet the demands of various markets and their unique application needs. To ensure the consistent quality of its full line of truck bodies, BrandFX utilizes the most advanced manufacturing and quality control processes.

For today's fleet manager, BrandFX is the smarter investment.

WIDE RANGE OF MAKES, MODELS, AND SIZES

The BrandFX™ EverLast™ offering of composite line truck bodies is designed and built for toughness – and BrandFX line bodies come in a wide range of makes, models, and sizes. They are available in 60”, 84”, 93”, 102”, 108” and 120” cab-to-axle sizes, as well as tandem cab-to-trunnion sizing.

Though well-equipped in their standard configurations, these line bodies can be designed to work with your fleet’s specific needs. In fact, there are hundreds of features available to ensure the perfect match, whatever your requirements.

These line bodies are also compatible with all leading manufacturers’ service cranes and aerials.
